pub v0.13.5 publisher dart.dev

A composable, Future-based library for making HTTP requests.

This package contains a set of high-level functions and classes that make it easy to consume HTTP resources. It's multi-platform, and supports mobile, desktop, and the browser.

Using

The easiest way to use this library is via the top-level functions. They allow you to make individual HTTP requests with minimal hassle:

```
import 'package:http/http.dart' as http;

var url = Uri.https('example.com', 'whatsit/create');
var response = await http.post(url, body: {'name': 'doodle', 'color': 'blue'});
print('Response status: ${response.statusCode}');
print('Response body: ${response.body}');

print(await http.read(Uri.https('example.com', 'foobar.txt')));
```

Flutter phone direct caller:

Readme Changelog Example Installing Versions Scores

flutter_phone_direct_caller

A simple plugin to call number directly from app, without going to phone dialer. Permission request is handled by plugin.

Usage

Add dependency to pubspec.yaml file

```
flutter_phone_direct_caller: ^2.1.1
```

Android

No need any additional configuration.

Readme Changelog Example Installing Versions Scores

Use this package as a library

Depend on it

Run this command:

With Flutter:

```
$ flutter pub add date_picker_timeline
```

This will add a line like this to your package's pubspec.yaml (and run an implicit `flutter pub get`):

```
dependencies:  
  date_picker_timeline: ^1.2.3
```

Awesome Dialog box
